

## ● EMMA kitchen- and dining table

---

EMMA is a simple high table which can be used either as a classic dining or kitchen table height 75cm or – equipped with a sink and a cooktop – as a basis for a puristic kitchen.

# ● EMMA kitchen- and dining table

EMMA can be extended and complemented with the modular ROLAND pedestal with wheels which can be perfectly placed under the table and offers a lot of storage space for all kitchen utensils. Robust stools of the same style as the table are also available. We produce EMMA tables in different lengths and widths.

The materials available are birch plywood panels, either oil-impregnated or varnished in color and they are laminated with a melamine resin coat (a light-transmissive tinted surface which emphasizes the grain of the wood, spotless and odorless, easy to clean, produced in Finland). For the standard colors see below, more colors can be delivered on demand.
