

BELLA LED light

BELLA is a simple and minimalistic yet highly functional LED light, suitable for a variety of spaces. With its signature shape, BELLA is the perfect complement to our hanging modular systems, LUIS and IDA.

BELLA LED light

The BELLA LED light can, depending on the selected model, either be moved at will or mounted in a chosen position. It is ideal for illuminating counterspace in the kitchen or the bathroom. It is a real eye-catcher that works beautifully, without pushing itself into the foreground.

A complement to our hanging modular systems, LUIS and IDA, BELLA integrates seamlessly into our furniture creations, giving your furniture a luminous finish with its understated design.

Our furniture is made from birch plywood panels. This solid panel material is of a premium quality and a great alternative to chipboard or MDF (fibreboard). It is a long-lasting and is therefore robust enough to withstand the high demands of day-to-day use. Its high solidity ensures that the furniture retains its stability and functionality for years to come.

Produced in Welsberg, South Tyrol.
Concept & Design: Georg Agostini, Lorenz Sternbach

BELLA Specifications

BELLA can be hung on the LUIS and IDA panels. The light is available in two models, with either adjustable or fixed mounting. By replacing the panel, BELLA can easily be added to your existing furniture.

Luminosity: 300 lumen
Light colour: Warm white
The LED light can be tilted so that you can adjust the direction of the light as needed.
