LUIS
Hanging modular system

LUIS is a flexible hanging modular system that enhances the kitchen, but can also be used in the living room, bedroom, bathroom or hallway in endless variations. LUIS can be used as a hallway storage unit, as a sideboard, as a TV cabinet or as a bookshelf.

LUIS Hanging modular system

The rather boring classic cabinet has been playfully reinterpreted and transformed into an eye catcher in its own right. A wooden panel is screwed to the wall and acts as the base for the rest of the system. The modules can then be hung up on the panel and easily moved around and adjusted so that LUIS is always where it needs to be. The modules are also adjustable in height, as each module is equipped with their two different height slots at the back. The individual modules are available as shelves or cabinets, with or without doors, in different standard sizes.

Our furniture is made from birch plywood panels. This solid panel material is of a premium quality and a great alternative to chipboard or MDF (fibreboard). It is a long-lasting and is therefore robust enough to withstand the high demands of day-to-day use. It (die high solidity) ensures that the furniture retains its stability and functionality for years to come.

Produced in Welsberg, South Tyrol.
Concept & Design: Georg Agostini, Lorenz Sternbach

LUIS Specifications

Modular shelving system – customizable and adjustable. The hanging modules can be moved around (up and down and side to side) and repositioned easily. Various standard modules are available (standard widths: 60 and 40 cm). Upon request, modules can also be made to order.
