

# GUSTAV

## Adaptable multipurpose panel

GUSTAV is our flexible multipurpose panel that can be customized using our various functional modules. The vertical notches in the panel, which add visual interest, can be used to fasten the modules, which can be rearranged again and again. Modular, adaptable and multifunctional – that's GUSTAV.

# GUSTAV Adaptable multipurpose panel

With its modular system, GUSTAV can be configured for different purposes and adjusted as needed. The various modules can be used to create functional storage space in the kitchen or to build a unique TV wall. GUSTAV is also suitable as a wardrobe or as an open shelf in your kid's room. Thanks to its unmistakable, minimalist design, GUSTAV can be combined with other furniture, rounding out the space.

Choose the functional GUSTAV modules that work for you. We have a desk, a clothes rail, two types of shelves, drawer or cabinet modules, with or without doors, in several standard sizes.

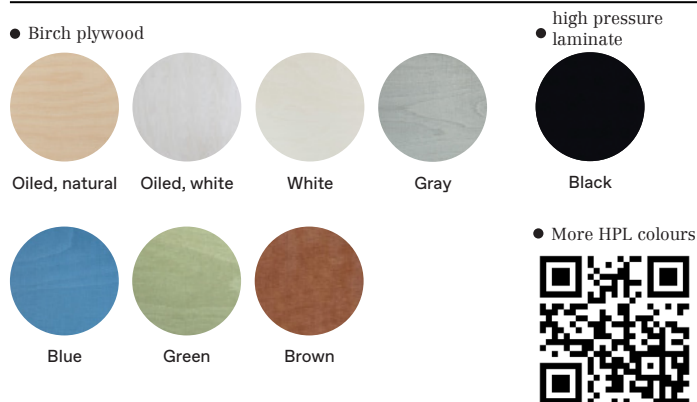

To produce the GUSTAV modules, we use either oiled or colour varnished birch plywood panels that have been coated with a melamine resin. The translucent, coloured surface emphasizes the grain of the wood, and is odourless and easy to clean. The modules are available in other materials and colour combinations upon request. The back panel is always either oiled, natural or oiled, white.

Produced in Welsberg, South Tyrol.  
Concept & Design: Georg Agostini, Lorenz Sternbach

## GUSTAV Specifications

The GUSTAV back panel is available with a 30 mm grid in various widths:  
Widths: 664, 964, 1,272, 1,848 mm
